Note: When the HMMWV is turned on that supplies current to the coil of this relay and also supplies power to all of the circuits that are connected through here.

Note: 2 and 10 are the coil connections.
Note: 7, 9, 3 are normally open connections
Note: 4, 5, 8 are normally closed connections
Note: 6, 11, 1 are the switched contacts
Note: The product manual for this part can be found in the product manual section of this CD.
