Primary lithium battery
LSH 14 “light”

3.6 V Primary lithium-thionyl chloride (Li-SOCl₂)
High power
C-size spiral cell
(non-restricted for transport)

Benefits
- High voltage response, stable during most of the lifetime of the application
- High drain/pulse capability
- Wide operating temperature range (-60°C/85°C)
- Easy integration in compact system
- Low self-discharge rate (less than 3% after 1 year of storage at +20°C)
- Non-restricted for transport

Key features
- Stainless steel container
- Hermetic glass-to-metal sealing
- Built-in safety vent
- Finish with 5 A fuse
- Non-flammable electrolyte

Main applications
- Radiocommunication and other military applications
- Alarms and security systems
- Beacons and emergency location transmitters
- GPS
- Metering systems
- Sonobuoys

</table>

Pulse capability: Typically up to 2000 mA (2000 mA/0.1 second pulses, drained every 2 min at +20°C from undischarged cells with 10 μA base current, yield voltage readings above 3.0 V. The readings may vary according to the pulse characteristics, the temperature, and the cell’s previous history. Fitting the cell with a capacitor may be recommended in severe conditions. Consult Saft)

- 3 PF, 3 PF RP
- CNA (AX)
- FL
- radial tabs
- radial pins
- axial leads
- flying leads... etc.
LSH 14 “light”

Dimensions in mm.

**Storage**
- The storage area should be clean, cool (preferably not exceeding +30°C), dry and ventilated.

**Warning**
- Fires, explosion and burn hazard.
- Do not recharge, short circuit, crush, disassemble, heat above 100°C (212°F), incinerate, or expose contents to water.
- Do not solder directly to the cell (use tabbed cell versions instead).
